

POOOL Disclosure Library

C. Revised Full Document Final

c

“Qualified Referral” means a referral satisfying all qualification conditions defined by POOOL, including valid attribution, completed KYC, completed first eligible paid investment, holdback/review clearance, and absence of any Disqualifying Event.

“Related-Party Referral Abuse” means self-benefiting or coordinated referral behavior using a household member, family member, controlled entity, nominee, assistant, proxy, shared economic beneficiary, or similar related structure to create commission or tier credit improperly.

4. Relationship to Other Program Documents

4.1 This Policy governs the operational meaning of:

- referral qualification,
- payable status,
- payout release controls,
- reversals,
- disqualification,
- dispute review,
- and evidence standards.

4.2 This Policy does not by itself determine:

- the full contractual rights and remedies between POOOL and the Affiliate,
- the final tax-law treatment of payouts,
- the full privacy-law treatment of data,
- or the full disciplinary framework outside qualification/payout logic.

4.3 Those matters remain governed by the Affiliate Terms & Conditions, Tax SOP / tax-handling framework, Privacy framework, Monitoring / Suspension / Clawback framework, and other applicable Program Documents.

5. Status Model

5.1 For operational clarity, POOOL should maintain a staged referral and commission status model.

Referral lifecycle statuses

- Attributed
- Registered
- Onboarding Completed, if separately tracked
- KYC Approved
- First Eligible Paid Investment Completed
- Under Holdback / Review
- Qualified
- Disqualified
- Reversed

Commission lifecycle statuses

- Provisionally Tracked
- On Hold
- Payable
- Paid
- Frozen
- Offset
- Clawback Pending
- Clawed Back

5.2 Additional sub-statuses may be used where needed, including:

- Pending Documentation
- Pending Tax Setup
- Pending Payout Setup
- Under Investigation
- Manual Review Required
- Related-Party Review
- Fraud Review

5.3 These stages must remain operationally separate. Product, finance, support, and reporting must not collapse them into one generic “commission” status.

6. Valid Attribution

6.1 A referral counts only if it is validly attributable to the Affiliate under POOOL's approved attribution system.

6.2 Attribution must be:

- technically recorded,
- linked to the correct Affiliate ID,
- associated with an approved referral link, code, or approved referral flow,
- and not invalidated by fraud, manipulation, override abuse, or policy breach.

6.3 Missing, corrupted, uncertain, disputed, or manipulated attribution may result in:

- no qualification,
- payout hold,
- manual review,
- tier-credit exclusion,
- or disqualification. **[LEGAL REVIEW REQUIRED]**

6.4 POOOL's system of record governs attribution unless corrected through an approved and logged internal review process.

7. Qualification Requirements

A referral becomes a **Qualified Referral** only when all of the following are satisfied:

7.1 Valid Attribution

The user is validly attributed to the Affiliate under Section 6.

7.2 Completed Required Onboarding

The user has completed the onboarding steps required for the relevant referral-to-investment journey.

7.3 Completed KYC

The user has successfully completed all required KYC and verification checks.

7.4 Completed First Eligible Paid Investment

The user has completed a first eligible paid investment through official POOOL flows.

7.5 Minimum Investment Rule Met, if Applicable

If POOOL adopts a minimum qualifying investment threshold, that threshold must be satisfied. **[LEGAL REVIEW REQUIRED]**

7.6 Holdback / Review Cleared

The applicable Holdback Period has expired and the related checks are complete.

7.7 No Disqualifying Event

No fraud issue, self-referral issue, related-party circumvention, referral-ring issue, policy-breach issue, reversal issue, or other disqualifying issue applies.

7.8 Affiliate Payout Readiness Cleared

The Affiliate's payout and tax setup is complete and the commission passes final payout controls.

7.9 A click, signup, incomplete onboarding, incomplete KYC, or initiated-but-unsettled investment does not by itself create a Qualified Referral.

8. KYC Requirement

8.1 A referral cannot qualify unless the referred user successfully completes all required KYC and verification requirements.

8.2 A referral with:

- incomplete KYC,
 - failed KYC,
 - rejected KYC,
 - or unresolved KYC review
- cannot become a Qualified Referral.

8.3 If KYC approval is later invalidated, the related referral may be disqualified or reversed.

9. First Eligible Paid Investment Requirement

9.1 A referral can qualify only if the referred user completes a first eligible paid investment through official POOOL flows.

9.2 The qualifying investment must be:

- actually paid,

- settled or accepted as completed under POOOL's operational rules,
- and not merely initiated, reserved, or pending indefinitely.

9.3 If POOOL adopts a minimum threshold for qualification, the first qualifying investment must meet or exceed that threshold. **[LEGAL REVIEW REQUIRED]**

9.4 An investment that later fails, reverses, is cancelled, or is administratively invalidated does not support qualification.

10. Holdback and Review Period

10.1 After the first eligible paid investment is completed, the related referral enters a Holdback Period.

10.2 During holdback:

- commission remains provisional only,
- no payout is due,
- qualification may still be reversed or denied,
- and fraud, compliance, attribution, and reversal checks remain open.

10.3 The recommended launch default Holdback Period is **30 days** from the first eligible paid investment event unless POOOL later approves another period in writing.

10.4 No referral may move into **Payable** status before holdback has expired and final checks are complete.

11. Payable Status and Payout Release

11.1 Commission becomes **Payable** only when all of the following are true:

- the referral is marked Qualified,
- the Holdback Period has expired,
- no unresolved Disqualifying Event exists,
- the Affiliate is active or otherwise payout-eligible under the Program rules,
- the Affiliate's payout profile is complete,
- the Affiliate's tax profile is complete,
- finance/compliance has not blocked the payout,
- and the payout is approved for release in the relevant payout cycle.

11.2 POOOL may operate payout cycles on a defined internal schedule. **[LEGAL REVIEW REQUIRED]**

11.3 Inclusion in a payout cycle remains subject to final checks up to release.

11.4 Provisional dashboard figures do not create a vested right to payout.

12. Holds, Blocks, and Freezes

12.1 POOOL may place a referral, commission, tier-credit event, or payout on hold, block, or freeze where:

- attribution is disputed,
- KYC is incomplete or under review,
- holdback is still running,
- fraud review is open,
- reversal risk is open,
- self-referral is suspected,
- related-party self-referral is suspected,
- referral-ring activity is suspected,
- policy breach is suspected,
- payout or tax profile is incomplete,
- the Affiliate is suspended or under investigation,
- or another material Program-integrity concern exists.

12.2 A hold or freeze may affect:

- qualification status,
- payable status,
- payout release,
- tier-credit inclusion,
- or all of the above.

12.3 A hold or freeze is an interim protective control and does not by itself determine final liability or final breach. **[LEGAL REVIEW REQUIRED]**

13. Anti-Fraud and Abuse Rules

13.1 A referral is not qualified, or ceases to remain qualified, where fraud, abuse, manipulation, or bad-faith conduct is detected.

13.2 This includes, without limitation:

- fake accounts,
- synthetic, false, or stolen identity use,

- fabricated onboarding activity,
- attribution manipulation,
- campaign-routing abuse,
- suspicious clustering,
- repeated same-beneficiary patterns where relevant,
- abusive payment patterns,
- rule evasion,
- and coordinated behavior intended to generate improper commission or tier credit.

13.3 POOOL may:

- disqualify affected referrals,
- freeze related payouts,
- exclude affected tier credit,
- suspend related accounts,
- reverse commission status,
- and escalate to clawback or removal where required.

14. No Self-Referral / Related-Party Referral Abuse

14.1 An Affiliate may not earn commission, tier credit, or payout from referring themselves.

14.2 Self-referral includes, without limitation:

- using one's own referral link or code for one's own account,
- routing one's own investment activity through one's referral path,
- using a controlled account,
- using a controlled entity,
- using a related person or proxy account for one's own economic benefit,
- or any similar self-benefiting structure.

14.3 Related-Party Referral Abuse includes, without limitation:

- household routing,
- nominee use,
- shared-beneficiary structures,
- family/friend arrangements designed to recycle benefit,
- proxy investment behavior,
- and other disguised self-benefiting arrangements.

14.4 Confirmed self-referral or related-party referral abuse results in:

- referral disqualification,
- removal of affected commission,
- removal of related tier credit,
- and possible enforcement action.

15. No Referral Rings

15.1 Affiliates must not participate in referral rings, reciprocal referral arrangements, circular referral behavior, or coordinated referral abuse.

15.2 This includes, without limitation:

- two or more Affiliates referring each other,
- household or related-party loops,
- reciprocal attribution swaps,
- circular sign-up structures,
- or any coordinated structure designed to manufacture commission eligibility or tier progression.

15.3 Suspected or confirmed referral-ring behavior may result in:

- disqualification of affected referrals,
- payout freeze,
- investigation,
- tier recalculation,
- clawback,
- suspension,
- or permanent removal.

16. Policy-Breach Exclusion

16.1 A referral is not qualified if it was generated through material breach of the affiliate rules.

16.2 This includes referrals sourced through:

- personal investment advice,
- asset recommendation,
- guarantee or return claims,
- private cold outreach,

- side deals,
- payment handling,
- unapproved materials,
- or other prohibited conduct. This is consistent with the approved Phase 1 conduct boundary.

16.3 POOOL may exclude such referrals even if the referred user completed KYC and invested.

17. Reversals, Refunds, Chargebacks, and Cancellations

17.1 A referral is not qualified, or may be reclassified out of qualified / payable status, if the qualifying event is later reversed or invalidated, including through:

- refund,
- reversal,
- chargeback,
- cancellation,
- failed settlement,
- administrative invalidation,
- compliance rejection,
- or similar unwind events.

17.2 If payout has already been made, POOOL may:

- reverse future payable amounts,
- offset future commissions,
- freeze future payouts,
- demand repayment,
- or claw back the affected amount,
where permitted under the Terms and other Program Documents. **[LEGAL REVIEW REQUIRED]**

17.3 Paid status does not prevent later correction where fraud, error, or a confirmed disqualifying event is later established.

18. Disqualification Events

A referral must be treated as disqualified where one or more of the following apply:

- invalid attribution,

- incomplete, failed, or rejected KYC,
- no first eligible paid investment,
- minimum threshold not met where applicable,
- holdback not yet cleared,
- fraud or abuse flag,
- self-referral,
- related-party referral abuse,
- referral-ring activity,
- policy breach,
- reversal / refund / chargeback / cancellation,
- incomplete Affiliate payout or tax readiness,
- Affiliate suspension or non-payout-eligible status at release,
- or any other disqualifying factor recognized by approved Program rules. **[LEGAL REVIEW REQUIRED]**

19. Commission Rate and Tier Interaction

19.1 The Program operates the approved 8-tier ladder:

- Access — 0.50%
- Plus — 0.75%
- Pro — 1.00%
- Elite — 1.50%
- Premium — 2.00%
- Platinum — 2.75%
- Signature — 3.50%
- Sovereign — 4.50%.

19.2 Tier unlock is based only on the Affiliate's own qualified referral volume within the applicable Lookback Period and not on self-purchase, recruitment, downline activity, team volume, or override logic.

19.3 Disqualified, reversed, frozen, or excluded referrals may be removed from:

- commission eligibility,
- payable status,
- and tier-credit calculations.

19.4 POOOL may recalculate Tier status where previously counted volume is later disqualified.

19.5 The exact timestamp rule for which Tier rate applies must be fixed in final Program logic and legal review. **[LEGAL REVIEW REQUIRED]**

20. Disputes and Review Requests

20.1 If an Affiliate disputes referral status, qualification, payable status, payout amount, exclusion, reversal, or tier treatment, the dispute must be raised through POOOL's approved review channel.

20.2 A dispute should include, where available:

- Affiliate ID,
- affected referral or commission reference,
- relevant date range,
- dispute category,
- and supporting evidence.

20.3 POOOL may:

- request additional evidence,
- pause payout pending review,
- rely on system-of-record data,
- reject unsupported claims,
- or uphold, modify, or reverse a provisional determination.

20.4 POOOL's system of record and approved investigation process govern unless corrected through a formal internal determination. **[LEGAL REVIEW REQUIRED]**

20.5 Filing a dispute does not by itself require payout release.

21. Evidence Standards

21.1 For any commission to move into Payable status, POOOL should be able to evidence the qualification path in its system of record.

21.2 Required evidence should include at minimum:

- Affiliate ID,
- referral link / code ID,
- attribution timestamp,
- referred user ID,
- registration and onboarding status,

- KYC approval status and timestamp,
- first eligible paid investment record,
- amount and settlement status where relevant,
- threshold pass/fail flag, if used,
- holdback start and end timestamps,
- review-clearance status,
- fraud / compliance / reversal flags,
- self-referral / related-party / ring-review status,
- Affiliate payout-ready status,
- Affiliate tax-ready status,
- provisional commission amount,
- final approved commission amount,
- payable approval timestamp,
- payout batch or release reference,
- and any exception or override log.

21.3 Where evidence is missing, incomplete, inconsistent, or disputed, payout may be held, denied, or reversed.

22. System-of-Record and Manual Overrides

22.1 POOOL's internal systems of record govern the status of:

- attribution,
- qualification,
- payability,
- payout release,
- reversals,
- freezes,
- disputes,
- offsets,
- and clawback handling.

22.2 Manual Overrides, if permitted, must be:

- authorized,
- reason-coded,
- logged,
- limited to approved personnel,
- and auditable.

22.3 Informal comments, chat messages, unsupported team requests, or dashboard anomalies do not by themselves alter system-of-record status.

23. Inactive, Suspended, or Non-Payout-Ready Affiliates

23.1 A referral may remain attributable even if the Affiliate later becomes inactive, suspended, under review, or temporarily non-payout-ready, but no payout may be released while payout-blocking conditions remain unresolved.

23.2 POOOL may determine under the Terms whether commission is denied, deferred, frozen, offset, or later released once the blocking condition is resolved. **[LEGAL REVIEW REQUIRED]**

23.3 No Affiliate is entitled to bypass compliance, suspension, or tax/payout controls merely because the underlying referral once appeared provisionally successful.

24. Operational Enforcement Link

This Policy is enforceable through:

- qualification hold,
 - payout hold,
 - referral freeze,
 - denial of affected commission,
 - tier recalculation,
 - offset,
 - clawback,
 - suspension,
 - and permanent removal,
- depending on facts, severity, and the applicable Program Documents.

25. Review and Amendment

25.1 POOOL may update this Policy from time to time.

25.2 Material changes may require:

- refreshed Affiliate acceptance,
- updated training,
- operational reconfiguration,
- revised product status logic,

- or revised payout logic. **[LEGAL REVIEW REQUIRED]**

25.3 Summary pages, dashboard helper text, onboarding copy, or support macros do not amend this Policy unless POOOL expressly states otherwise in writing.

D. Final legal-review flags only

1. Final Holdback Period.
2. Final minimum qualifying investment threshold, if any.
3. Final payout-cycle timing and release schedule.
4. Final rule for which Tier/rate timestamp applies.
5. Final wording on system-of-record priority and Manual Override authority.
6. Final evidence burden and review standard for attribution disputes.
7. Final post-payment reversal, offset, demand-for-repayment, and clawback rights.
8. Final treatment of household, family, controlled-entity, and nominee cases in self-referral / related-party abuse review.
9. Final rule for Affiliates who become suspended, terminated, inactive, or non-payout-ready while referrals are pending.
10. Final alignment with the Tax SOP and Monitoring / Suspension / Clawback framework.
11. Any jurisdiction-specific consumer-protection or financial-promotion wording counsel wants added to this policy.

E. Readiness note for internal review, operational use, and legal review

This revised draft is ready for:

- internal review,
- product and finance implementation review,
- anti-fraud / support / operations workflow design,
- and focused legal review.

It is stronger than the current file because it keeps the same approved qualification logic while turning the document into a cleaner standalone **control policy** rather than a mixed file containing policy, UI copy, backend notes, and recommendation text. It remains consistent with the approved baseline, the Terms, and the Code: referral-only Phase 1, no MLM, no advice/selling/payment handling, qualified-referral gating, 30-day working holdback assumption, and anti-abuse / no-self-referral / no-ring logic.
