What It Is

POOOL operates a performance-based affiliate program — the **Partner Syndicate** — that allows vetted financial creators, wealth managers, and established investor communities to earn commissions by referring new investors to the platform.

This is not an open referral link anyone can generate. It is a **curated, compliance-first partner channel** with identity verification, a mandatory knowledge exam, legal agreement signing, and a multi-step payout validation process before any money changes hands.

The program functions as a scalable, cost-efficient customer acquisition engine. POOOL only pays commissions after a referred investor completes a real, settled investment — there are no costs for clicks, signups, or unqualified traffic.

Business Case

Metric	What It Means for POOOL
Performance-based cost	Commission only paid after investment clears a 30-day validation window
Zero upfront spend	No cost for clicks, signups, or incomplete conversions
Partner quality gate	KYC and compliance exam filter out unsuitable partners before any link is issued
Scalable reach	High-quality affiliates bring their own established audiences
Legal protection	Every partner signs binding legal agreements before activation
Max commission rate	1.75% of referred investment — only at top tier after 500+ qualified referrals

The Four Partner Categories

During the application process, every affiliate identifies their primary distribution channel. This categorises the partner network into four groups:

1. Financial Newsletter / Substack Authors

Independent financial writers with paid or free subscriber lists. These partners typically reach high-intent investors who already consume financial content regularly. Examples include market analysis newsletters, real estate investment publications, and private wealth education blogs.

2. YouTube & Video Content Creators

Creators producing financial education, property investment, or passive income content. Video audiences tend to be larger and more broadly distributed, with conversion rates tied to the creator's credibility and editorial positioning.

3. X (Twitter) / Social Media Communities

Operators of investor-focused social communities, Twitter accounts, or discussion groups. These partners often have highly engaged, niche audiences with strong peer-influence dynamics — well-suited for promoting private-market investment opportunities.

4. Private Wealth Advisors & Advisory Networks

Licensed or unlicensed wealth professionals who maintain existing client or prospect relationships. This is the highest-value partner category, as referrals from trusted advisors tend to convert with higher average investment sizes. POOOL's compliance framework is especially important here, as these partners must not cross into regulated investment advice.

Note: The partner's audience size is also collected at application: under 5,000, 5,000–50,000, or over 50,000. This informs POOOL's review and tier expectations but does not automatically determine approval.

The Affiliate System — End to End

Stage 1: Discovery (Promo Page)

Non-approved users who navigate to the affiliate section land on a **locked promotional page** — they cannot access the dashboard or any partner tools until they apply and are approved.

The promo page presents:

- The program's value proposition for partners

- A summary of the 8-tier commission structure

- The three partner qualification criteria (Relevant Audience, Compliant Distribution, Quality Referrals)

- An interactive earnings calculator

- An FAQ section covering the most common questions about payout timing, qualified referrals, and permitted marketing activities

Two calls to action: **Request Partner Access** and **Are You Qualified?**

Platform statistics are shown publicly: \$12M+ assets under management, 24 live properties, 8 commission tiers, 1.75% maximum commission rate.

Stage 2: Application & Vetting (Onboarding Wizard)

The application is a five-step guided process with a progress bar. Each step must be completed in order.

Step 1 – Partner Profile

The applicant describes their distribution channel and audience:

Primary traffic source (Newsletter, YouTube, Twitter, Wealth/Advisory, or Other)

Audience size bracket

Main website or social profile URL

Phone number (for POOOL's review team to follow up if needed)

Step 2 – Identity Verification

The system checks the applicant's existing KYC status on the platform. If identity verification has not been completed, the applicant must complete it before continuing. No referral code is ever issued to an unverified identity.

Step 3 – Tax Information

The applicant provides their tax identification number and, optionally, their legal company name if they intend to invoice as a business entity. A notice is shown at this step explaining the 30-day holdback rule and that tax documentation will be required before any payout is released.

Step 4 – Legal Agreements

Five legal documents are presented as tabbed content. The applicant must read each document and individually check a separate acceptance box for each:

1. **Affiliate Terms & Conditions** – Program structure, activation requirements, enforcement, and termination conditions
2. **Affiliate Code of Conduct** – What the affiliate may and may not do (role is referral only, not advice or sales)
3. **Qualified Referral & Payout Policy** – Definition of a qualified referral, the holdback period, and clawback conditions
4. **Approved Marketing Materials Policy** – What materials may be used, what is prohibited, and how original content must be handled
5. **Affiliate Privacy Notice** – What data POOOL collects and how it is used

Every acceptance is logged on the server with the affiliate's identity, IP address, timestamp, and the document version accepted. This creates an immutable compliance record.

Step 5 – Compliance Exam

A mandatory five-question knowledge test. All five questions must be answered correctly – a single wrong answer fails the exam and triggers a 10-minute lockout. The exam is validated server-side; it cannot be bypassed by manipulating the application.

The five questions test understanding of the most critical rules:

1. Are affiliates allowed to provide investment advice? (*No – referral information only*)
2. Can affiliates guarantee returns or asset safety? (*Never*)
3. When is commission paid? (*After 30-day holdback, KYC, and tax clearance*)
4. Can affiliates accept or forward client funds? (*Absolutely forbidden*)
5. Is cold outreach via WhatsApp or Telegram permitted? (*No*)

After passing the exam, the application enters admin review. The applicant sees a confirmation screen with a timeline: Onboarding Complete → Admin Review (1–3 business days) → Account Activation. An email confirmation is sent.

Stage 3: Admin Review & Activation

The POOOL compliance team reviews every application manually. The admin checks:

- That the applicant's KYC status is fully approved
- The traffic source and audience claims are plausible
- No red flags in the application data

If approved, the admin assigns a unique referral code to the partner and activates their account. An activation email is sent. If rejected, a rejection email is sent with a reason.

Stage 4: Active Partner – The Dashboard (Partner Portal)

Once approved, affiliates have access to a private partner portal with four main sections.

The Partner Portal – Page by Page

Page 1: Partner Dashboard (Main Hub)

This is the affiliate's primary working screen. It is divided into two columns.

Top row – three KPI cards:

Total Earnings – Lifetime commission earned, with a sub-label showing how much has been paid out

Available to Payout — Commissions cleared and ready for withdrawal; includes a "Request Payout" button that is only active when a balance is available above the \$50 minimum

Under 30-Day Holdback — Commissions earned but not yet cleared through the review window; shown as pending qualification

Left column — two panels:

Referral Link Widget:

The affiliate's unique referral link is displayed with a one-click copy button. Above the link, an **Advanced Tracking** section allows affiliates to add optional campaign parameters:

SubID — A custom tag the affiliate sets to identify a specific campaign (e.g. "email_blast_may"). This lets them track which campaign drove which referrals.

UTM Source — The platform or channel (e.g. "twitter", "newsletter"). This feeds into POOOL's attribution reporting.

Below the link, a QR code is automatically generated for offline or print use.

Also in this panel: an **S2S Postback Webhook** field where advanced affiliates can enter a URL from external tracking platforms (Volum, RedTrack, etc.). When a commission event occurs, POOOL pings this URL automatically, enabling professional affiliate trackers to log conversions in real time.

Referral Funnel:

A visual four-step funnel showing the conversion path for this affiliate's referrals:

Clicks → Signups → Invested (In Holdback) → Qualified

This gives affiliates a clear picture of where their audience is dropping off and how many referrals are progressing through the pipeline.

Right column — three panels:

Tier Progression:

Shows the affiliate's current tier name and commission rate, a progress bar across all 8 tiers, and markers for where each tier threshold falls. The bar updates as more referrals qualify.

Recent Commissions:

A live list of the most recent commission entries — each showing the referral and its status.

SubID Tracking Report:

A table breaking down performance by campaign tag. For each SubID, it shows: clicks, registrations, earned commissions, and pending commissions. This allows affiliates to compare campaign performance at a glance.

Page 2: Referrals & Payouts

A detailed table of every referral ever attributed to this affiliate. The page has four tab views:

All Referrals – Complete history

Under Holdback – Referrals currently in the 30-day review window with their expiry date visible

Payable – Cleared commissions awaiting the next payout batch

Completed – Paid commissions with settlement records

Each row in the table shows: status, registration date, holdback expiry date, and commission amount.

A search bar allows filtering by referral ID, email fragment, or status keyword.

This page gives affiliates full transparency over the entire lifecycle of every referral – from first click through to final payment.

Page 3: Marketing Materials

A brand asset library providing approved promotional content ready to download and use.

Brand Guidelines section: A downloadable PDF covering POOOL's visual identity rules, approved messaging, and required disclaimers for all affiliate promotions.

Social Media Assets section: Pre-sized, brand-approved graphics in three formats:

LinkedIn / Twitter Banner (1200×628px PNG)

Instagram Post (1080×1080px PNG)

Instagram / TikTok Story (1080×1920px PNG)

Logos & Brand Elements section: The official POOOL logo in SVG format for both light and dark backgrounds.

Custom Material Review section: Affiliates who create original content (blog posts, videos, social posts) can submit files here for compliance review before publishing. Accepted formats include PNG, JPG, SVG, PDF, MP4, and ZIP up to 20MB. A status table below the upload form shows previously submitted materials and their review outcome (Pending, Approved, or Rejected with a reason note).

Access gate: *If an affiliate's status is not active, this entire page is replaced by a locked state with a message explaining that materials are available only to approved affiliates.*

Page 4: Payout & Tax Settings

A settings screen where affiliates manage the financial and tax details that govern how they receive payments.

Tax Classification section:

A notice at the top warns that changing tax details will temporarily freeze payout capability while the compliance team verifies the update. The affiliate provides:

Tax classification: Indonesian Individual / Sole Proprietor, Indonesian Business Entity, or Foreign Recipient
Tax ID / SSN (masked in the display; only re-entered if updating)
Optional VAT number
Legal business or full name
A perjury-level certification checkbox confirming the provided tax number is correct

Payout Account section:

Currently only one method is available: POOOL Cash Wallet, described as instant with zero fee. Commissions land in the affiliate's internal POOOL investor wallet, from which they can be reinvested into new properties or withdrawn to a linked bank account. Bank Transfer and USDC Crypto options are shown as coming soon.

Status sidebar:

A small panel showing the affiliate's current Tax Status and Payout Status as live badges, plus two key reminders:

Minimum payout threshold: \$50.00
Tax year 1099s generated by January 31st

The Commission Structure in Full

Affiliates start at Access tier on approval and advance automatically as their lifetime qualified referral count grows. The tier determines the commission rate applied to every investment made by their referred users.

Tier	Qualified Referrals Required	Commission Rate
Access	Entry — no minimum	0.50%
Bronze	3+	0.60%
Silver	10+	0.75%
Gold	25+	0.90%
Platinum	50+	1.10%
Diamond	100+	1.30%
Elite	200+	1.50%
Ambassador	500+ (invitation only)	1.75%

Qualified referral definition: A referred user who (1) was validly attributed to the affiliate, (2) completed full identity verification, (3) made a first eligible paid investment, (4) passed the 30-day review window with no fraud flags, and (5) had no disqualifying issues on either party's account.

What does not count: Clicks, signups without investment, incomplete KYC, cancelled transactions, or any referral flagged for fraud.

Commission model: Single-level only. There are no downlines, no recruitment bonuses, and no multi-level structure. An affiliate earns only on the investors they personally refer.

The 30-Day Holdback – How Money Flows

When a referred investor makes their first qualifying investment, POOOL creates a provisional commission entry. This commission sits in a holdback period for 30 days. During those 30 days:

1. The investment must remain active (not cancelled or refunded)
2. The referred investor's account must remain in good standing
3. No fraud flags can be raised on either party
4. The affiliate's KYC and tax documentation must be in order

After all conditions are met, the commission moves from provisional to payable.

Payouts are then triggered manually by a POOOL admin – not automatically. The admin reviews the affiliate's tax readiness, marks them cleared, and initiates a payout batch. The funds move from POOOL's treasury to the affiliate's cash wallet in a single locked transaction. A full audit trail is written at every step.

If a qualifying event is later reversed (investment cancelled, fraud discovered, policy breach found), POOOL can claw back a commission even after it has been paid.

Compliance & Legal Safeguards

Three layers of legal protection:

Layer 1 – Pre-activation agreements

Every affiliate explicitly signs five documents individually. Each acceptance is logged with their identity, IP address, timestamp, and the document version signed. If policies are updated to a new version, affiliates must re-sign before payouts can continue.

Layer 2 – Investor-side disclosures

When a referred investor reaches the investment checkout, they see an expanded set of disclosures triggered by the fact that they arrived via an affiliate link. This includes an acknowledgement that the referring party may earn a commission. These disclosures are permanently logged.

Layer 3 – Tax compliance

Tax classification and identification are collected at onboarding and stored encrypted. No payout can be released by an admin until the affiliate's tax status has been explicitly reviewed and cleared. Changing tax details freezes payouts automatically until re-verification is complete.

Fraud Prevention

Protection	How It Works
No self-referral	An affiliate cannot refer their own account
Click fraud throttling	Repeated clicks from the same IP within a short window are ignored
Single attribution	A referred user can be attributed to only one affiliate, even across multiple referral links
24-hour IP deduplication	Same IP + same referral code within 24 hours generates only one recorded click
Commission clawback	Admins can reverse a paid commission and recover the funds from the affiliate's wallet
Immediate suspension	Admins can suspend an affiliate instantly, freezing their link and blocking all new attributions

Advanced fraud ring detection — identifying circular networks where affiliate A refers affiliate B and B refers A — is in development.

Admin Control Panel

The POOOL operations team manages the entire program through a dedicated admin interface with four sections:

Affiliate Applications Desk

A review queue of all pending partner applications. Each application shows the applicant's profile data, traffic source, audience size, KYC status, and exam completion. Admins can approve (assigning a referral code and commission rate) or reject (with a reason that is emailed to the applicant). Active affiliate count is shown as a live KPI.

Finance & Tax Release Board

A table of all commissions that have cleared the 30-day holdback and are ready for payout, grouped by affiliate. Admins review each affiliate's tax classification, mark them as tax-ready, and trigger payout batches. Each payout is an atomic operation — it either fully completes or fully rolls back. Bulk actions allow multiple affiliates to be paid in a single operation. Every action generates an audit log entry.

Compliance & Suspension Tools

Admins can suspend any active affiliate immediately. Suspension sends an automated notification email and blocks all new referral attribution. A clawback function allows recovery of commissions from the affiliate's wallet in cases of fraud or policy breach.

Fraud Monitoring

A visualisation of referral networks to detect suspicious patterns — affiliates who appear to be referring each other, clusters of referrals from the same IP address, or abnormal referral velocity. (Advanced graph-based detection is on the near-term roadmap.)

Email Notifications — Full Lifecycle

The system sends automated emails at every significant event:

Event	Recipients
Application submitted	Affiliate (confirmation) + POOOL admin (alert)
Application approved	Affiliate
Application rejected	Affiliate (with reason)
Commission becomes payable	Affiliate
Payout batch released	Affiliate
Account suspended	Affiliate

Summary

The POOOL Partner Syndicate is a fully operational, compliance-first affiliate acquisition channel. It enables POOOL to grow its investor base through four categories of trusted partners – financial newsletter authors, video creators, social community operators, and private wealth advisors – paying only for verified results, only after a 30-day validation window, and with full legal documentation and fraud protection at every step.

The program is built to scale: each approved affiliate brings an established audience at no upfront cost to POOOL, with automatic tier progression rewarding the partners who consistently deliver the highest-quality referrals.
